

PATEL INSTITUTE OF SCIENCE & MANAGEMENT

(A UNIT OF PATEL RAMAIAH EDUCATIONAL & CULTURAL TRUST®)

Affiliated to Bengaluru North University, Approved by AICTE, Govt. of India, New Delhi

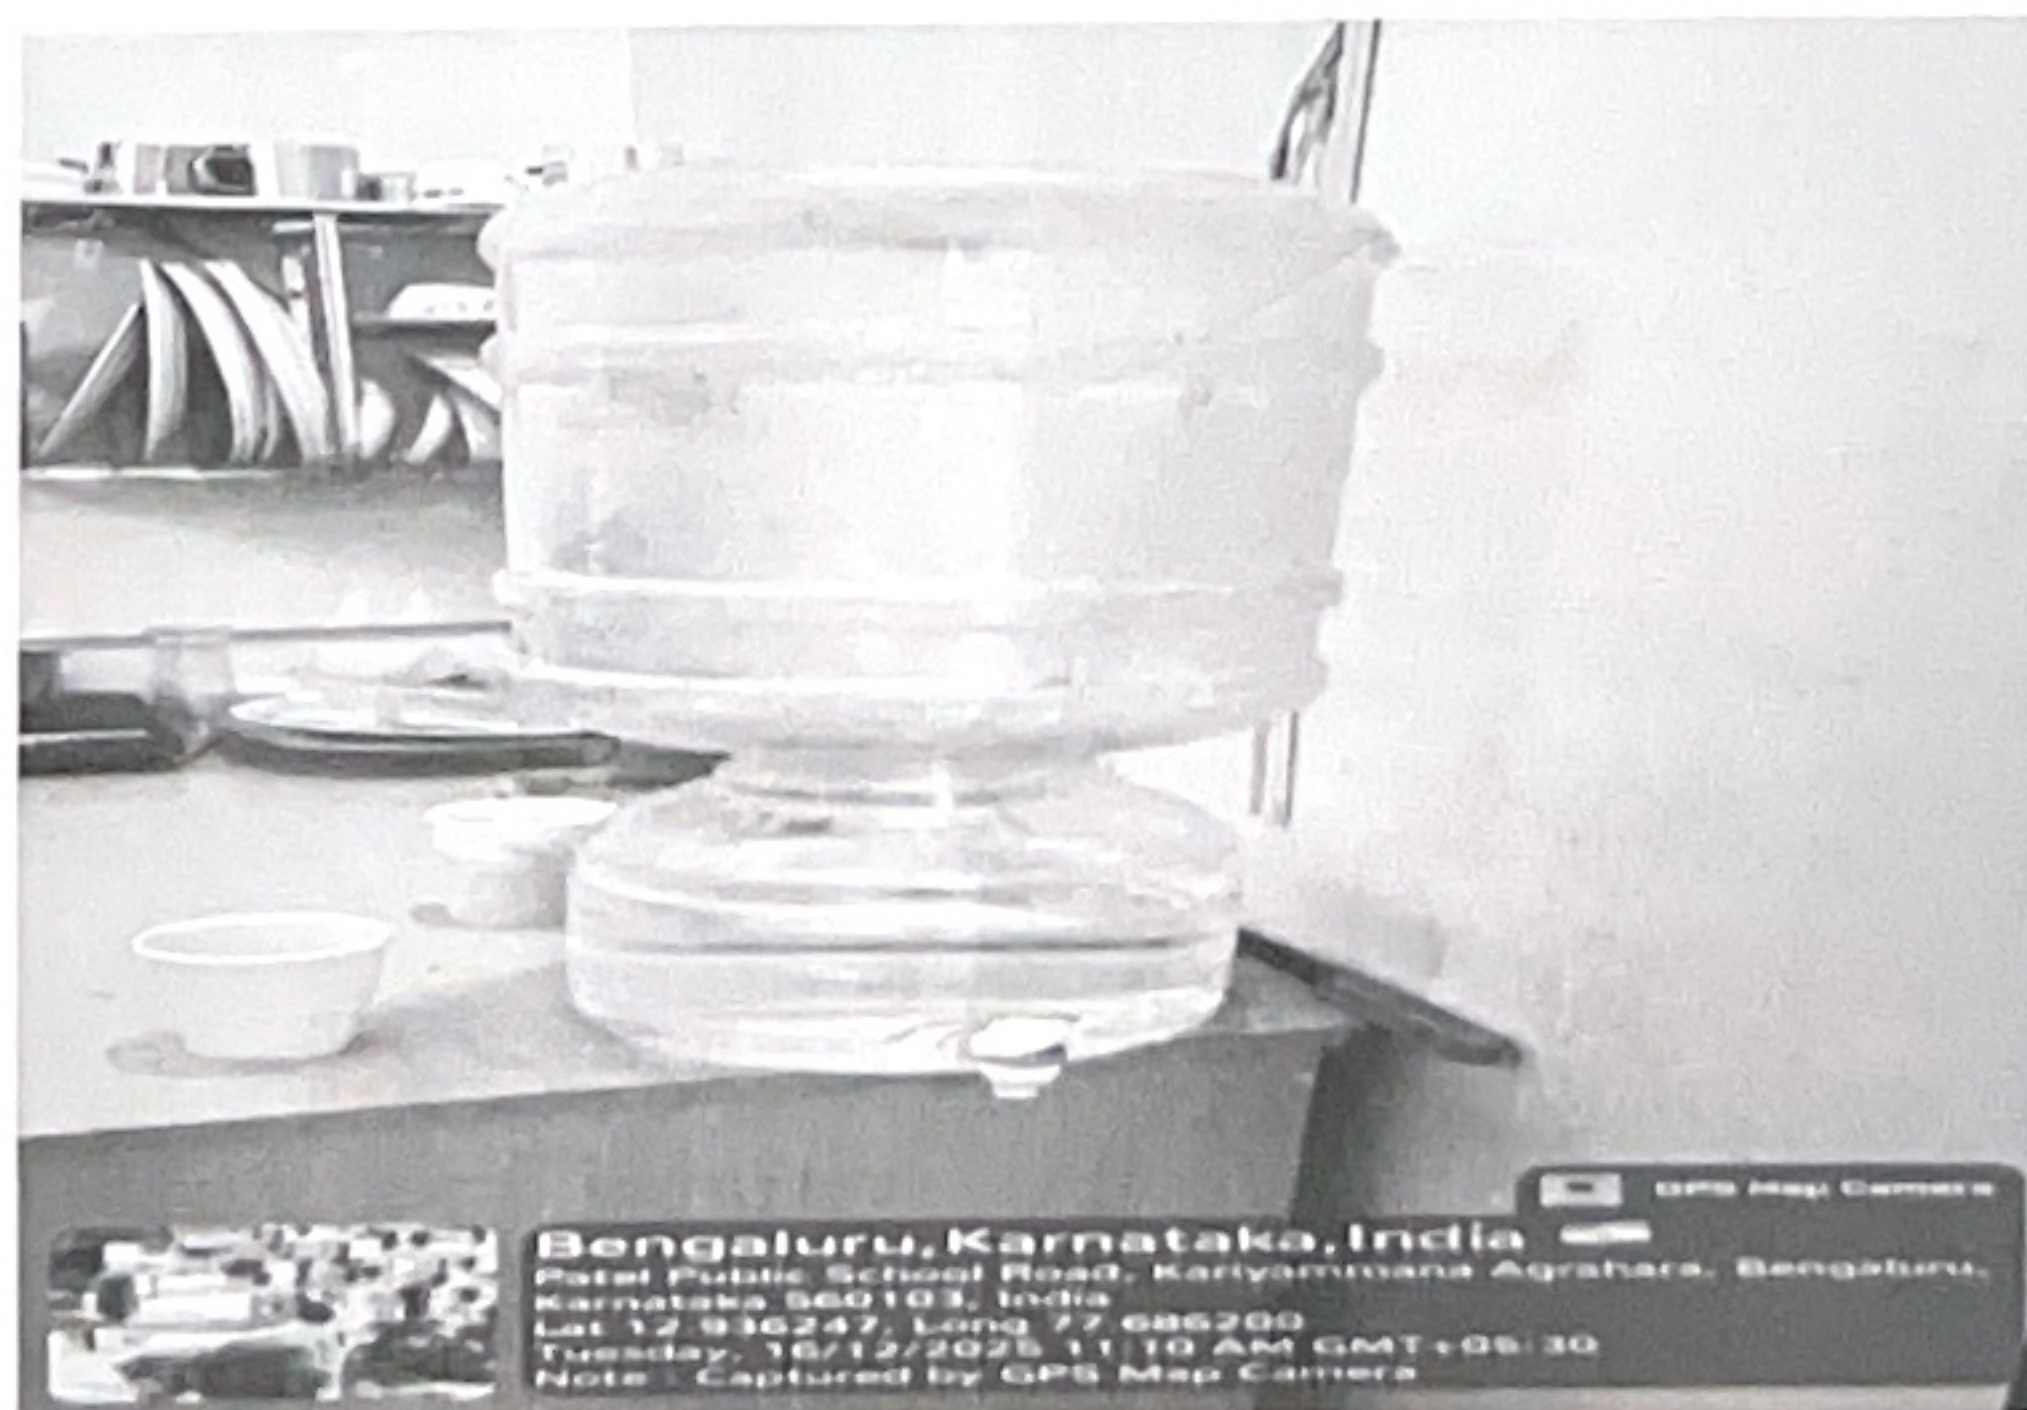

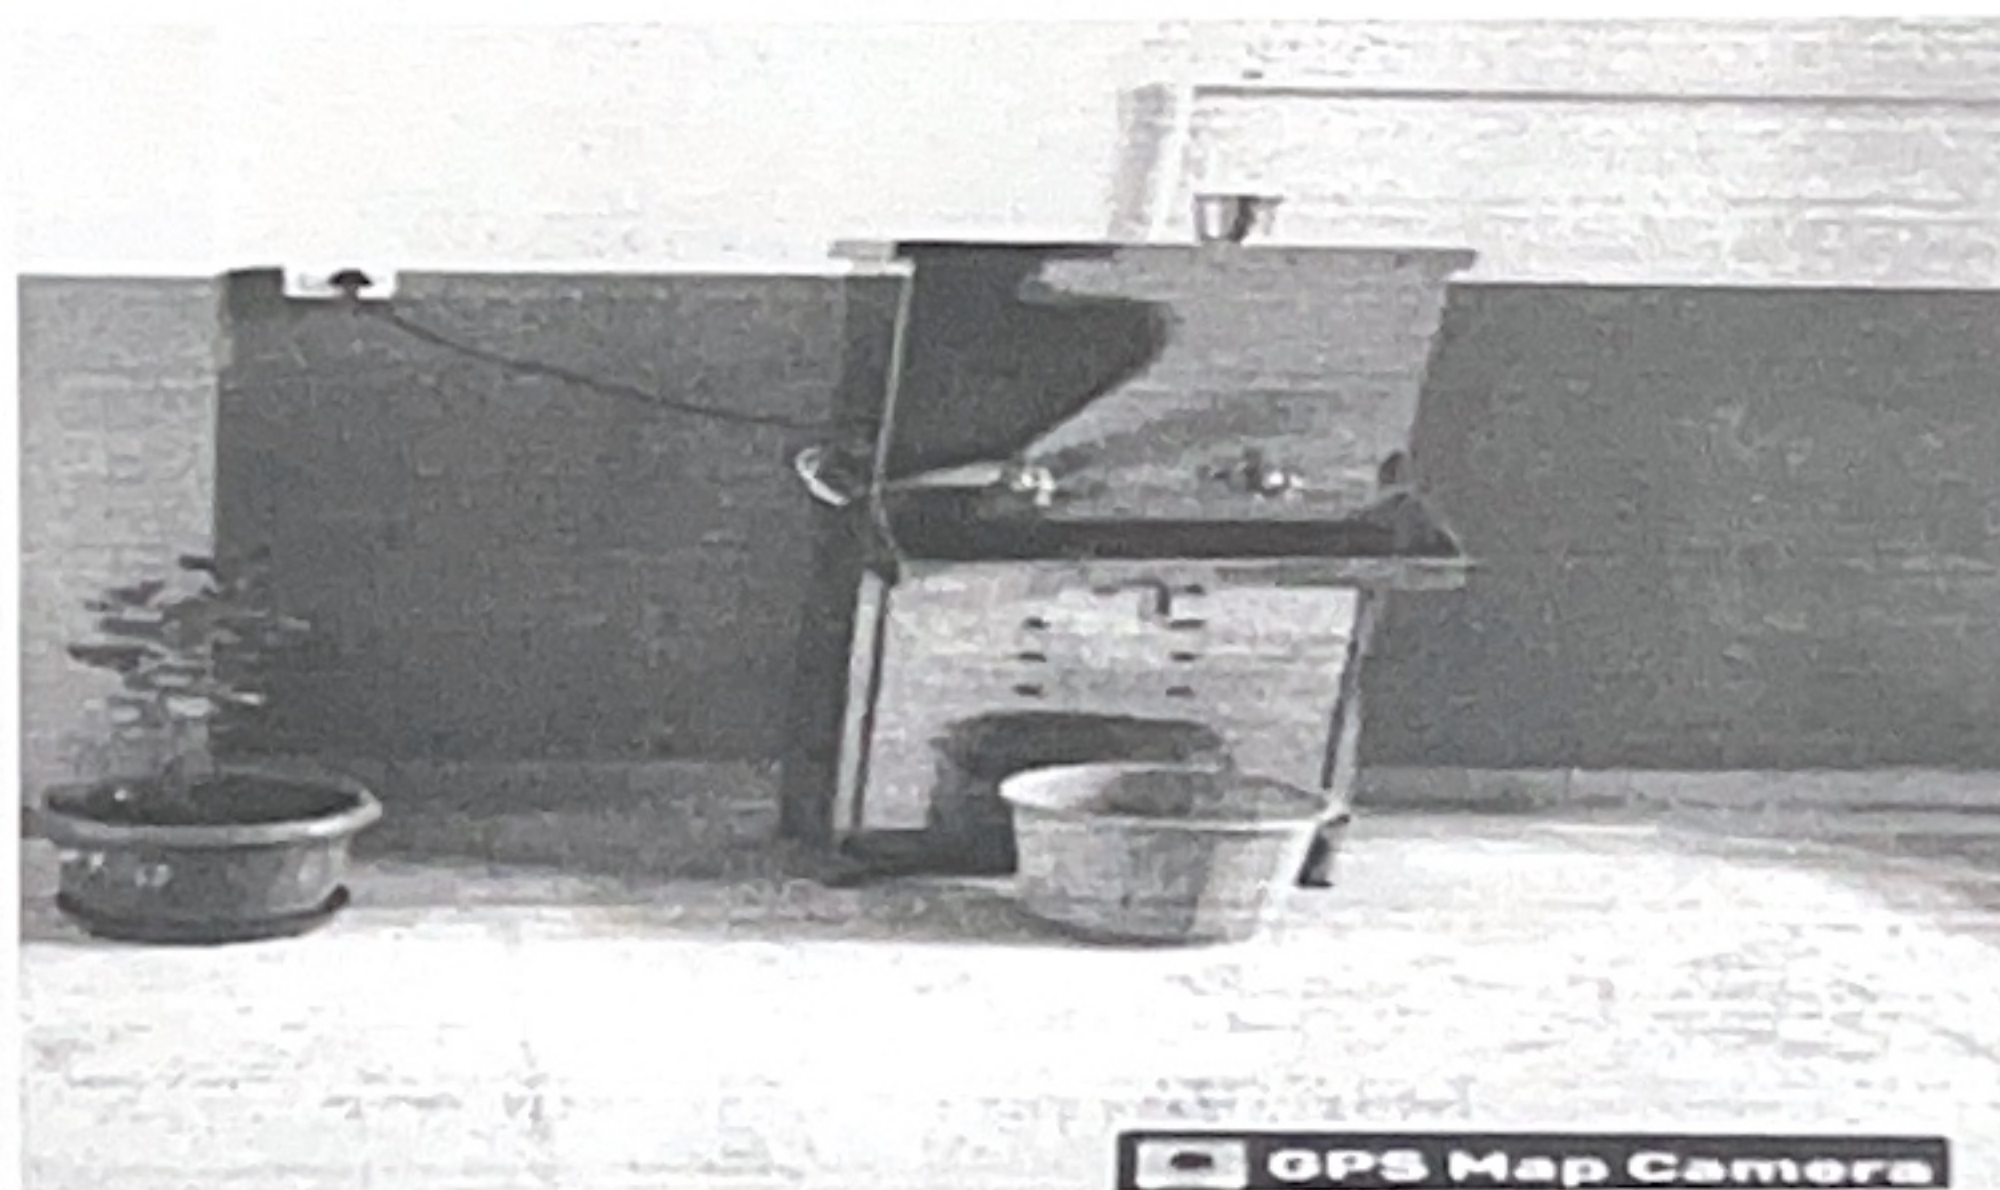

POTABLE WATER SUPPLY

At Patel Institute of Science and Management, we understand the importance of clean and potable water for the health and well-being of our students, faculty, and staff. To ensure the availability of safe drinking water, we have set up a comprehensive potable water supply system on campus.

Our water supply system comprises of multiple sources, including bore wells and municipal water supply. To maintain the quality of our potable water supply, we regularly test the water samples in our on-campus laboratory. We also ensure that the water storage tanks are cleaned and disinfected periodically.

In addition, we have installed multiple water dispensers at strategic locations on campus to provide easy access to clean drinking water for our students, faculty, and staff. We encourage everyone to carry their reusable water bottles to reduce plastic waste and promote sustainability.

At Patel Institute of Science and Management, we are committed to providing a healthy and safe environment for everyone on campus, and our potable water supply system is a testament to that commitment.
